

Customer Journey Map

Date	30 th September 2026
Team ID	SWTID-2026-2214
Project Name	Script-Controlled ACL – Restrict Record Access Based on Field Value
Maximum Marks	2 Marks

Customer Journey Map

Map out the customers' experience stage-by-stage, capturing their actions, touchpoints, thoughts, and feelings, along with process ownership and improvement opportunities at each stage.

Phase of Journey	Stage 1 User Authentication & Access Request	Stage 2 ACL Validation	Stage 3 Record Access
Actions <i>What does the customer do?</i>	Logs in to ServiceNow; opens Institution Details; requests access to records.	System checks user roles; evaluates ACLs; checks the Branch field and required permissions.	Views permitted records; creates, updates, or deletes records according to assigned roles.
Touchpoint <i>What part of the service do they interact with?</i>	ServiceNow Login, Web UI, Application Navigator, Institution Details application.	User roles, ACL configuration, Branch field, ACL script, data condition.	Institution Details list, record form, Create, Update, and Delete functions.
Customer Thought <i>What is the customer thinking?</i>	"I need to access the Institution Details records."	"Does my role allow me to access this record?"	"I can access only the records and operations permitted by my roles."

Customer Feeling <i>What is the customer feeling?</i>	Confident	Curious	Secure
Process Ownership <i>Who is in the lead on this?</i>	ServiceNow Administrator	ServiceNow Administrator / Security Administrator	ServiceNow ACL / Security System
Opportunities <i>How can we improve this stage?</i>	Provide clear login and access requirements.	Use precise ACL conditions and regularly test security rules.	Review roles and ACLs regularly and test different role combinations.
