

Project Initialization and Planning Phase

Date	30 th September 2026
Team ID	SWTID-2026-2214
Project Name	Script-Controlled ACL – Restrict Record Access Based on Field Value
Maximum Marks	3 Marks

Define Problem Statements (Customer Problem Statement Template):

Create a problem statement to understand your customer's point of view. The Customer Problem Statement template helps you focus on what matters to create experiences people will love. A well-articulated customer problem statement allows you and your team to find the ideal solution for your customers' challenges. Throughout the process, you'll also be able to empathize with your customers, which helps you better understand how they perceive your product or service.

Example:

Problem Statement (PS)	I am (Customer)	I'm trying to	But	Because	Which makes me feel
PS-1	A ServiceNow administrator managing institutional records	Control of access to institution records based on user roles and branch	Different users may have different access permissions	Institutional records contain information that should only be accessible to authorized users	Concerned about unauthorized access to records
