

Demonstration of Proposed Features

Date	30 th September 2026
Team ID	SWTID-2026-2214
Project Name	Script-Controlled ACL – Restrict Record Access Based on Field Value
Maximum Marks	1 Mark

Demonstration of Proposed Features:

This document captures all the features proposed during the project planning phase and tracks whether each feature was successfully implemented and demonstrated. It serves as evidence of the team's ability to implement the proposed Script-Controlled ACL solution.

S.No	Feature Name	Description	Status (Implemented / Partial / Pending)	Demonstrated (Yes / No)	Remarks
1	ACL Configuration	Configure an ACL to control access to ServiceNow records.	Implemented	Yes	ACL configured successfully
2	Field Value Validation	Check the specified field value before granting record access.	Implemented	Yes	Field value condition verified
3	Script-Based Access Control	Use a script to determine whether access should be allowed.	Implemented	Yes	Script executed successfully
4	Record Access Restriction	Restrict access when the field value does not satisfy the condition.	Implemented	Yes	Unauthorized access restricted
5	User Access Verification	Verify user access before allowing the user to view the record.	Implemented	Yes	User access tested
6	ACL Testing	Test access using different field values and verify the results.	Implemented	Yes	Access results verified

Feature Implementation Summary:

Total Features Proposed	6
Total Features Implemented	6
Total Features Demonstrated	6
Overall Implementation Rate (%)	100%
