

No. of Functional Features Included in the Solution

Date	30 September 2026
Team ID	SWTID-2026-2214
Project Name	Script-Controlled ACL – Restrict Record Access Based on Field Value
Maximum Marks	5 Marks

Functional Features Overview:

This document lists all the functional features included in the project solution. Each feature is described with its purpose, implementation status, and contribution to the overall solution.

S.No	Feature Name	Feature Description	Module / Component	Status (Done / In Progress / Pending)	Marks Contribution
1	Field Value Validation	Checks the specified field value before granting access to a record.	ACL	Done	Controls record access
2	Script-Based Access Control	Uses script logic to determine whether access should be allowed.	ACL Script	Done	Provides dynamic access control
3	Record Access Restriction	Restricts access to records that do not satisfy the defined field condition.	Record Security	Done	Prevents unauthorized access
4	User Access Verification	Validates the user's access before allowing record access.	User Validation	Done	Improves security
5	Condition-Based Authorization	Grants access when the required field value meets the defined condition.	Authorization	Done	Provides controlled access
6	Unauthorized Access Prevention	Prevents users from accessing restricted records.	Security Control	Done	Protects sensitive records
7	ACL Testing	Tests the ACL behavior using different field values and users.	Testing	Done	Verifies functionality
8	Access Control Management	Provides controlled management of record-level access.	ServiceNow ACL	Done	Improves data security

Feature Summary:

Metric	Count / Value
Total Features Planned	8
Total Features Implemented	8
Core / Must-Have Features	6
Additional / Nice-to-Have Features	2
Features Tested & Verified	8

Feature Category Breakdown:

S.No	Category	Features Category	in	Example Features
1	User Interface (UI)	1		Record access based on field value
2	Backend / Logic	3		ACL script, field validation, authorization
3	Database / Storage	1		ServiceNow record and field data
4	API / Integration	0		Not applicable
5	Security Authentication	3		Access restriction, user verification, unauthorized access prevention
