

Project Demo Planning

Date	30 th September 2026
Team ID	SWTID-2026-2214
Project Name	Script-Controlled ACL – Restrict Record Access Based on Field Value
Maximum Marks	1 Mark

Project Demo Planning:

A well-structured demo plan ensures that the team presents the project effectively, covering all key aspects in a clear and organized manner. This document outlines the plan for demonstrating the project, including the flow of the demo, key features to highlight, and responsibilities of each team member.

S.No	Demo Section	Description	Duration (mins)	Responsible Member
1	Introduction & Problem Statement	Explain the need to restrict access to institution records based on user roles and branch values.	2	Subramani S
2	User & Role Creation	Demonstrate the EEE User and the roles bb1 , bb2 , bb3 and bb4 used for access control.	2	Vishwa P
3	Institution Details Table	Show the u_institution_details table and its fields such as Student Name, Faculty Name, Branch, Email and Phone Number.	2	Uma M C
4	ACL Configuration	Demonstrate the Read, Create, Write and Delete ACLs and explain how the script and roles control access.	3	Soniya N
5	Live Testing	Use user impersonation to verify EEE record access and test Create, Write and Delete permissions.	3	Subramani S
6	Results & Conclusion	Explain the final results and how the project prevents unauthorized access to institution records.	2	Uma M C

Demo Flow Summary:

Step	Activity	Notes
1	Introduction & Problem Statement	Explain the problem of unauthorized access to institution records.
2	Solution Overview	Explain the ServiceNow table, user roles and script-controlled ACL approach.

3	Live Feature Demonstration	Demonstrate ACL configuration, user impersonation and access restrictions.
4	Q&A Session	Answer questions about roles, Branch conditions, ACLs and testing.
