

Project Executable Files

Date	30 th September 2026
Team ID	SWTID-2026-2214
Project Name	Script-Controlled ACL – Restrict Record Access Based on Field Value
Maximum Marks	3 Marks

Project Executable Files

This section requires submission of all executable and deployable files for your project. Ensure all files are properly organized, named, and uploaded to the specified submission platform. The evaluator must be able to run or deploy your solution using the provided files and instructions.

Step 1: Submission Checklist

S.No	Item to Submit	Submitted (Yes / No / NA)
1	Complete source code (all files and folders)	NA – ServiceNow configuration
2	README / Setup Guide (instructions to run the project)	Yes
3	requirements.txt / package.json / dependency file	NA
4	Database schema / seed files (if applicable)	NA – ServiceNow table configuration
5	Environment configuration file (.env.example or similar)	NA
6	Deployed application URL (if hosted)	Yes – ServiceNow instance URL
7	APK / Executable binary (if applicable for mobile/desktop apps)	NA
8	Dockerfile / Containerization config (if applicable)	NA

9	Test files and test results	Yes – ACL testing through user impersonation
10	Demo video or walkthrough (if required)	https://youtu.be/J1KhQPSSh0s

Step 2: File / Folder Structure

Provide an overview of your project's file and folder structure below:

- User: EEE User
- Roles: bb1, bb2, bb3, bb4
- Table: u_institution_details
- Fields: Student Roll Number, Student Name, Faculty Name, Branch, Email, Phone Number, Description
- ACLs:
 - Read ACL
 - Create ACL
 - Write ACL
 - Delete ACL
- ACL scripts and role-based access configuration
- Test records for EEE, ECE and CSE branches

Step 3: Deployment / Access Details

Field	Details
Hosted / Deployed URL	https://dev308246.service-now.com/now/nav/ui/classic/params/target/ui_page.do%3Fsys_id%3D1eb69440c36b0310085d990ed401317e
Login Credentials (Demo)	meet.uma26@gmail.com password : Uma@2611
Platform / Hosting Provider	Service Now
Repository Link	https://github.com/meetuma26-crypto/script-controlled-acl-servicenow/tree/main

Demo Video Link	https://drive.google.com/file/d/1lmy7517GNUG7uu_3rplRwkNKcy_omKG3/view?usp=drive_link
------------------------	---

Step 4: Run Instructions

Provide clear, step-by-step instructions for the evaluator to run your project locally:

Test User: EEE User

Roles: bb1, bb2, bb3, bb4

Custom Table: u_institution_details

Fields:

- Student Roll Number
- Student Name
- Faculty Name
- Branch
- Email
- Phone Number
- Description

Access Control Lists:

- Read ACL
- Create ACL
- Write ACL
- Delete ACL

Scripts: Role-based and branch-based access control

Test Records: EEE, ECE and CSE branch records

Step 5: Known Issues / Limitations

S.No	Known Issue / Limitation	Workaround / Status
1	The project requires access to a ServiceNow instance.	Use the provided ServiceNow lab instance.
2	There is no traditional executable file because the project is configured in ServiceNow.	Run the project directly in the ServiceNow platform.
3	Access depends on the user's assigned roles and ACL configuration.	Verify user roles and ACL conditions before testing.
