

Technology Stack

Date	30 th September 2026
Team ID	SWTID-2026-2214
Project Name	Script-Controlled ACL – Restrict Record Access Based on Field Value
Maximum Marks	2 Marks

Define Your Technology Stack:

Identify the programming languages, frameworks, databases, front-end tools, back-end tools, and APIs that you will use to build your solution. A well-chosen technology stack ensures that your application is scalable, maintainable, and aligned with your project requirements.

Fill out the table below to detail the specific technologies chosen for each component of your architecture and provide a brief justification for your choice.

Technology Stack Details

S.No	Architecture Component / Layer	Technology Chosen	Justification / Purpose
1	Frontend / Client-Side	<i>ServiceNow Web UI</i>	<i>Provides the user interface for accessing the Institution Details table and performing permitted operations.</i>

2	Backend / Server-Side	<i>ServiceNow Platform + JavaScript</i>	<i>Used to implement ACL scripts, role checks, and record-level access control logic.</i>
3	Database / Data Storage	<i>ServiceNow Database / Custom Table u_institution_details</i>	<i>Stores Institution Details records including Student Name, Faculty Name, Branch, Email, Phone Number, and Description.</i>
4	Cloud / Hosting / Deployment	<i>ServiceNow Platform / ServiceNow Instance</i>	<i>Provides the hosted environment for the application, database, security configuration, and ACL processing.</i>
5	Version Control & CI/CD	<i>ServiceNow Update Sets</i>	<i>Used to capture and migrate configuration changes such as tables, fields, roles, and ACLs between ServiceNow instances.</i>

6	Third-Party APIs / Other Tools	<i>ServiceNow ACLs and Security Controls</i>	<i>Provides role-based and field/record-level access control for READ, CREATE, WRITE, and DELETE operations.s</i>
